## Exclusive Photographic Safari #1

5 Nights

Spread over nearly 70 square kilometres of pristine Zululand bushveld, fever tree forests and rolling hills, this reserve is bisected by the Mkuze River and home to a splendid variety of animals and birds. Apart from species including lion, elephant, leopard and cheetah that roam freely across the region, are there over 400 bird species recorded on the reserve and its surrounds, offering an incredible diversity of wild subjects native to the area.

Vehicle safaris, with no more than two clients per row, and several state-of-the-art photographic hides offer visitors never-seen-before opportunities of observing African wildlife. These hides are unique in their design and execution in Africa and have in conjunction with the fresh additions to traditional vehicle safaris already produced several award-winning photographs in some of the world's top wildlife photography competitions.

In process of being one the region's premier wildlife photographic destination, is the management and staff of this reserve striving to push the boundaries of a new wildlife experience unlike that found anywhere else on the continent, and through sustainable ecotourism create a protective haven for all species that call this area home.
