Exclusive Photographic Safari #3

3 Nights

The Lodge offers 2 different hides of which one is perfectly positioned for the magical sunset light of the African bush. The sunken Photography Hide are highly sought after for wildlife photography while the other is well positioned for you as photographer to capture close up images in early morning sunlight. It is ideal for both birding as well as wildlife photography.

During our stay here we will ensure everyone gets a session in each hide should we get only one session per day will we enjoy Game Drives for either morning or afternoon when we are not in the hides.

A wonderful once in a lifetime opportunity for the more serious photographer to catch that amazing photograph you have been hoping for...
